Stocks of Grains
in All Positions

U. S. DEPARTMENT OF AGRICULTURE

July 24, 1959

RECORD FEED GRAIN, WHEAT, AND SOYBEANS STOCKS

Stocks of all feed grains, wheat, and soybeans in all positions on July 1 maintained the pattern of record levels. Wheat stocks at 1.3 billion bushels exceeded the previous record in 1955 by 23 percent and oats at 369 million bushels exceeded the 1956 record by 6 percent. Corn stocks at 2.2 billion bushels, sorghum grain at 529 million bushels, barley at 193 million bushels and soybeans at 157 million bushels were 5, 54, 15, and 46 percent respectively above the previous record level of July 1, 1958. Rye and flaxseed stocks each were sharply above the previous year. Stocks of feed grains -- corn, oats, barley, and sorghum grain -- totaled 87 million tons, more than a tenth above the 77.5 million tons in storage July 1, 1958.

Wheat stocks of 1,277 million bushels stored in all positions on July 1 were nearly a half larger than last year and a record carry-over for the date. Total stocks amounted to 87 percent of the record 1958 harvest with about 95 percent of the stocks either owned by the CCC or under CCC loan. Off-farm wheat stocks of 1,162 million bushels were two-fifths larger than a year earlier with increased holdings in all storage positions. Farm stocks of 115 million bushels were more than double a year earlier. Disappearance from all storages during the April-June quarter was 264 million bushels compared with 242 million a year earlier.

Rye stocks of 12.8 million bushels stored in all positions on July 1 were 31 percent above the carry-over a year earlier and two-fifths above average. Stocks in each storage position, except for terminals, were above July 1 a year ago, with the farm stocks proportion of total stocks a near record. Farm stocks at 4.4 million bushels accounted for 34 percent of total stocks and were the largest since 1944. Off-farm stocks of 8.4 million bushels were about 15 percent above July 1, 1958 and almost a fourth above average. Stocks at interior mills and elevators were the third largest of record and near double the stocks in this position a year earlier. Terminal stocks of 2.2 million bushels were only about half of last year and average. Holdings in CCC bins were above last year, but still relatively small.

Corn stocks in all storage positions July 1 at 2,204 million bushels were a record for the date and 5 percent above the previous high a year earlier. Stocks in interior mills, elevators and warehouses at 444 million were 16 percent larger than a year ago. The 113 million in terminals was also well above a year ago, but stocks in CCC bin sites declined. Stocks in all off-farm positions were 1,089 million bushels of which about 1,050 million bushels were CCC owned or under warehouse loan. Stocks on farms at

Crop Reporting Board

Washington, D. C.

1,115 million bushels were 8 percent above a year earlier. CCC loans on farm stored corn, including reseals and purchase agreements outstanding June 30, 1959 covered about 445 million bushels, 7 percent above July 1, 1958.

Disappearance of corn from all storage positions during the April-June quarter was 787 million bushels, 12 percent above the same quarter last year and in line with the heavy rate of disappearance for other recent quarters.

Correction for Corn Stocks April 1, 1958: The amount of corn in Commodity Credit Corporation bin sites in Kansas on April 1, 1958 has been corrected to 6,998,000 bushels from the previously published 16,998,000 bushels. April 1, 1958 corn stocks published in "Stocks of Grains in All Positions" dated April 24, 1959, are revised as follows: page 3, Column 2 Corn - Commodity Credit Corporation from 618,762 to 608,762 and corn total from 2,807,878 to 2,797,878 bushels. Page 5, column 1, Kansas, from 26,343 to 16,343 and U. S. from 1,126,935 to 1,116,935. Also page 5, column 3, Kansas from 43,348 to 33,348 and U. S. from 2,807,878 to 2,797,878.

Oats carryover stocks of 369 million bushels in all storage positions on July 1 were 14 percent above a year earlier and the largest of record for the date. Stocks on farms at 300 million bushels were 9 percent above July 1, 1958 and accounted for over four-fifths of the total oats stored. Off-farm stocks of 69 million bushels were more than a third above a year earlier, but about 5.5 million bushels below holdings on July 1, 1956. Oats under loan to or owned by the CCC accounted for 27 percent of the total stocks compared with 17 percent a year earlier. Disappearance of oats during the April-June quarter amounted to 298 million bushels -- nearly a tenth more than during the same quarter of 1958.

Barley stocks on July 1 totaled a record high of 193 million bushels for this date -- 15 percent above the previous record of a year earlier. Stocks do not include any grain from the 1959 crop. Holdings on farms at 64 million bushels, were 2 percent above last year's record and holdings off farms at 129 million bushels, were 22 percent above the record of July 1, 1958. More than eight-tenths of the barley on hand July 1 were under price support or owned by CCC which was about the same proportion as on July 1, 1958. Disappearance of barley from all storages during the April-June quarter was 95 million bushels--the same as the record-high of the same quarter last year.

Sorghum grain stocks in all positions July 1 at 529 million bushels were far above the previous July 1 record of 343 million last year. Stocks in interior mills, elevators and warehouses at 370 million account for most of the total. Stocks in all off-farm positions were 495 million bushels of which 487 million was CCC owned. Stocks on farms at 35 million were well above the 28 million a year earlier. Nearly half the farm stocks were resealed under price support operations. Disappearance of sorghum grain from all storage positions during the April-June quarter was 83 million bushels or 1 million above the same quarter last year.

* Other States and unallocated to avoid disclosing individual operations.

1/ Includes stocks at Interior Mills, Elevators and Warehouses, Commercial stocks reported by Grain Division, AMS, at terminals, and those owned by Commodity Credit Corporation which are in bins and other storages under CCC control.

2/ Off-farm total plus farm stocks.

Soybeans stocks at 157 million bushels in all storage positions on July 1 were the largest of record for the date and nearly 50 percent above a year ago, the previous high. Terminal, processor, and elevator and warehouse stocks were above July 1, 1958 and record for the date. Farm stocks were above July 1, 1958 but slightly below the record of July 1, 1957.

Stocks on July 1 indicate a disappearance during the 9 months October 1958 - June 1959 of 438 million bushels from a supply of 595 million bushels. The supply consisted of a carry-over of 21 million bushels plus the 1958 production of 574 million bushels. During the period 312 million bushels were processed for oil and nearly 90 million bushels were exported. Seed, feed, and losses amounted to about 31 million bushels. In addition there were at least 4 million bushels of new crop crushings before October 1, 1958. Thus the indicated and known disappearance are in close balance.

Flaxseed carryover stocks in all storage positions on July 1 totaled 14.9 million bushels. This was more than two-thirds larger than the 8.7 million bushels on hand a year earlier and almost a fifth above average. Most of the stocks on July 1 were in off-farm positions as farm stocks accounted for only 3.2 million bushels.

July 1 stocks indicate a disappearance during the period July 1958 through June 1959 of 33.4 million bushels from a supply of 48.3 million bushels (carryover of 8.7 million plus 1958 production of 39.6 million bushels). During the period, crushings amounted to 22.4 million bushels, exports amounted to 7.0 million bushels and seed about 2.5 million bushels.

The totals in this report are assembled by the Crop Reporting Board, bringing together commercial stocks at terminals as reported by the Grain Division of the Agricultural Marketing Service, stocks of soybeans at processing plants as reported by the Census Bureau; grains reported by the Grain Branch of the Commodity Corporation and stored in bins, ships, and other storages under CCC control; estimates of the Crop Reporting Board for stocks on farms and at merchant mills and interior mills, elevators, and warehouses.
